

# March Meeting

March 9, 2010 – 6:00 P.M.

Portola Community Center  
45480 Portola Avenue, Palm Desert

*Featured Speaker:* Don Chapman  
President, BioOrganics

## The Miracle of Mycorrhizae

Don Chapman, president and owner of BioOrganics, a company that markets mycorrhizae, will be our featured speaker for March.

Mr. Chapman will explain how mycorrhizae, a beneficial fungus, promotes strong roots by increasing plants ability to uptake nutrients and produce strong and healthy roses.

Microbiological methods continue to offer a sustainable alternative to the continued use of chemical fertilizers, especially in marginal sandy soils.

BioOrganics, a Palm Springs based company, has marketed mycorrhizal inoculants for farms, nurseries, landscapers and home gardens for 13 years. It is an internationally recognized reliable source for beneficial microorganisms sold through mail order, internet, and dealerships.

If you would like more information about mycorrhizae, visit [www.bio-organics.com](http://www.bio-organics.com) or read my article in the March issue of our newsletter.
